WEBSITE REDESIGN — BUILD SPEC

Homepage redline & content guide.

A section-by-section guide to evolving Draft 1 (balto-capital.vercel.app) into the live site. Each section is marked Keep, Change, Remove, or Add, with the exact copy to use.

START HERE

What this document is

Draft 1 looks great but is built like a boutique brochure. Avenue Living — the model — is built as a rental-conversion engine. This guide keeps Draft 1's refined look and rebuilds the structure to actually convert renters: search, browse, book a viewing.

Keep Change Remove Add (new)

- Two global corrections to apply everywhere on the site:**
- 1. **Timeline:** Private & mezzanine lender since 2023 → first property acquisitions in 2025 → 1,500+ doors today. Do *not* say "family-operated since 2023" — direct ownership began in 2025. (Run by a brother and sister — use "family-operated," not "owner-operated.")
 - 2. **City framing:** Do *not* anchor on a city count ("four cities") — the portfolio is consistently growing. Use "across Western Canada, and growing." Yellowknife is "Coming soon" — not bought yet, no live listings.

THE NEW HOMEPAGE, TOP TO BOTTOM

Header, hero & proof

01 Header / Navigation		CHANGE
KEEP	Logo, clean nav style, the city dropdown pattern.	
CHANGE	Nav items become renter-focused: Residences · Why Balto · About · Resident Portal . Add a clear "Resident Portal" button (currently buried). Replace placeholder phone +1 (XXX) XXX-XXX with the real number.	
02 Hero + Search Bar		CHANGE
PROBLEM	Draft hero says "Find your residence" then offers only a vague "Discover" button. The #1 missing element vs. Avenue Living is a rental search bar .	
ADD SEARCH	Three fields + button, directly in the hero: City · Max Rent · Bedrooms · [Search homes] . It should route to filtered listings (connect to your management/listing system).	
MAX RENT = NET	Important: the "Max Rent" figure shown and filtered on is the net effective rent after promotion — the actual monthly rent the resident pays once any concession/promo is applied — not the gross/face rent. Display net-after-promo as the price everywhere on the site (search, cards, property pages).	
HEADLINE	<i>Homes across Western Canada. One standard.</i>	
SUBHEAD	<i>Thoughtfully maintained apartment homes across Western Canada — owned and run by the same family team that answers your call.</i>	
EYEBROW	<i>Family-operated · Western Canada</i>	
03 Proof Band		ADD (NEW)
WHY	A navy strip of stats right under the hero. Numbers build more credibility than adjectives — this is how Avenue Living signals scale ("350+ Locations").	
CONTENT	• 1,500+ — Doors across Western Canada • Western Canada — local teams in every city, growing (+ <i>Yellowknife coming soon</i>) • Since 2023 — In real estate finance (<i>direct ownership since 2025 — see story</i>) • 1 day — Maintenance response standard	

Cities, listings & benefits

04 Our Cities

KEEP / EDIT

KEEP	The 4-card city grid — it's the strongest part of Draft 1.
EDIT	Saskatoon, Edmonton, Regina are live. Yellowknife becomes a muted "Coming soon" card — no listings, distinct styling, with an email-capture ("register interest").
SECTION COPY	<i>A focused portfolio across Western Canada — and growing. Every building chosen, kept, and cared for with intent. Start with your city.</i>

05 Featured Residences

ADD (NEW)

WHY	The conversion core. Avenue Living leads with suite cards: photo, name, address, "from \$X," bed types, and a Book Viewing button. Replace Draft 1's transaction cards entirely.
EACH CARD	Building photo · City · Building name · Address · Bed types · "from \$X / month" · Book viewing link. Pull live from your management system; don't hard-code.

06 Why Rent With Balto

ADD (NEW)

ANGLE	Your single biggest differentiator: you own what you manage . No third-party manager. Lead with it.
FOUR BENEFITS	• Family-operated — a brother-and-sister team that owns and runs the buildings. • One-day response — maintenance answered within one business day. • Renovated & secured — updated suites and upgraded building security. • Pet-friendly homes — many residences welcome pets.

Steps, reviews, story & the removal

07 How To Rent

ADD (NEW)

5 STEPS

Search → Book a viewing → Apply → Get approved → Move in. Mirrors Avenue Living's process strip; reassures first-time renters.

08 Resident Reviews

ADD (NEW)

WHY

Social proof. Pull real Google reviews into a carousel (name + city + star rating). Collect these before launch if you don't have them yet.

09 "Recent Transactions" block

REMOVE

REMOVE FULLY

This block publishes **borrower entity names, named guarantors, and loan amounts** from your lending side — confidential, aimed at lenders not renters, and listing cities (Quebec, Winnipeg) that aren't part of the rental portfolio. **Delete from the public site.** The lending origin survives as one neutral line in the story section.

10 Our Story / Heritage

CHANGE

KEEP

The restrained editorial tone and the brick/architecture imagery.

CHANGE

Fix the timeline. Tell the real arc without names or figures.

BODY COPY

Balto Properties began in 2023 as a private and mezzanine real estate lender. In 2025 we moved into direct ownership — acquiring, renovating, and operating apartment communities across Western Canada, a portfolio that continues to grow. We buy buildings to keep them, which is why we treat every resident as a long-term relationship, not a transaction.

TIMELINE

2023 Private & mezzanine lending · **2025** First property acquisitions / direct ownership · **Today** 1,500+ doors across Western Canada, growing.

11 Inquiry CTA

KEEP

KEEP

"Begin your inquiry" works. Point it at the rental search / contact, not investor inquiry.

CHANGE

Add **Resident Portal + Maintenance Request** links, real phone number, and keep social. Drop "selected, restored, and stewarded by hand" if it reads too boutique — or soften to "owned and operated across Western Canada."

Property & city page templates

Each building needs a property page with a location blurb and a description tuned to the asset. The full copy for all buildings follows in Part Two of this document. The structure for each page:

Property page — required blocks

TEMPLATE

- | | |
|--------------------|--|
| 1 • GALLERY | Building + suite photos. Lead image is the building exterior. |
| 2 • HEADER | Building name · full address · "from \$X" · bed types · Book Viewing button. |
| 3 • LOCATION BLURB | What it's near — transit, shopping, schools, parks. (Written per building.) |
| 4 • DESCRIPTION | Tone tuned to the asset: value-add buildings lead with renovations + security; newer/premium lead with finishes. |
| 5 • SUITES | Available units table — bed/bath, sqft, rent, availability, apply link. |
| 6 • MAP | Pin + nearby amenities. |

Description tiers — write each building in one of three voices: **VALUE-ADD** renovated under Balto: lead with updated suites + upgraded security. **NEWER** elevated, lead with finishes & lifestyle. **PREMIUM** the Edge & Whyte Ave: fully elevated. **COMING SOON** Yellowknife only.

Verify before publishing: bed/bath counts, rents, in-suite finishes (from your management system), and confirm each building's tier — these were assigned from your "some newer / some value-add" note.

Property copy — named residences

A blurb for every building: name, location, area, and what it's close to. Older buildings are written as renovated and updated; the newest and best-positioned get an elevated voice. Drop these onto each property page.

Verify before publishing: bed/bath counts, rents, and in-suite finishes come from your management system. One name still pending (West End, 10126 154 St).

Edmonton

The heart of the portfolio — renovated, updated residences across Edmonton's most livable neighbourhoods, with local management in every building.

Verify before publishing: bed/bath counts, rents, and in-suite finishes come from your management system. Location facts are researched from the real addresses.
